Company/Organization Established Sustainability Protocols

Tell us about your company/organization's existing sustainability commitment, programs, procedures and tools in place to ensure optimum environmental performance. Applicant's environmental protocols must currently encompass a minimum of 80% of the listed criteria. Or, the applicant must agree to attain minimal compliance by the end of the first year of membership. *Check all that apply:*

Commitment to Sustainability

- We have a written living, flexible, and changing sustainability plan that encompasses proven protocols and advancements.
- Our commitment to protecting where we work and live is actively demonstrated throughout our company/organization.
- We are committed to networking with like-minded providers to ensure integrated environmental performance.

Established Protocols

- Monitoring and responsiveness to environmental regulatory agencies' updates and directives.
- Proactive research, development, and implementation of applicable environmental performance advancements.
- Regular corporate environmental updates with internal and external communities via electronic and/or printed media.
- Corporate self-assessment of maintenance shop, plant operations, and equipment environmental performance.
- Outsourced audits of maintenance shop, plant operations and equipment environmental performance.
- Timely follow-ups to ensure swift resolution of identified issues.
- Use of an internal incident alert notification system.

Tools and Methods

- Use of a self-contained, spill-free used fluid management system: _____
Name of system(s) in use
- Sealed shop floor to prevent seepage of used automotive and equipment fluids into soil and ultimately ground water.
- Use of used fluids transfer system that eliminates drain pans in shops: _____
Name of system(s) in use
- Alternative energy-powered vehicles and/or equipment _____
Type of Energy

Training

- Environmental Compliance Training for all front-line employees.
- Environmental Performance Training Program for site management.
- Environmental Training and Certification Program for automotive, equipment and machine maintenance technicians
- Annual Environmental Conference and Training Seminars and Classes
- Professional Growth and Development Plans for technicians, drivers, operators and facility maintenance staff
- Master Mentoring Program offering training for new staff members
- Out-Sourced Training

Membership Criteria

Eligibility

CES welcomes global supply chain providers who share the common goal of advancing an integrated effort to protect the environment and the wellbeing of people, planet and profit. CES is the link for those who share this green mindset for commerce within the framework of the environmental process to help secure green tomorrow for this and future generations.

Requirements

- A. Adhere to the Membership Compliance Program instituted by the Board of Directors, which includes an annual CES site(s) audit of the member corporation's environmental practices, tools, and improvements.
- B. Become active participants in the CES B2B networking program designed to help ensure that like-thinking providers are the members' preferred choice when contracting for services.
- C. Commit to an annual environmental process self-assessment to determine what the member's company needs to keep doing, stop doing, and start doing to position or maintain the company, its employees, and its transportation fleet as a certified **Enviro 360®** partner.
- D. Respect, honor and adhere to not only the established Intellectual Property laws and protections enforced by the European Patent Office (EPO), the Japan Patent Office (JPO), the United States Patent and Trademark Office (USPTO), and the World Intellectual Property Organization (WIPO), but also to the patented - and unpatented - innovation and creativity of all inventors in all business dealings within the supply chain.
- E. Actively work to help grow the CES membership.
- F. Agree to allow CES to use your company's logo in marketing materials and media relations to help establish the strength of the Council and its impact on a sustainable supply chain.

Membership Benefits

- CES **Enviro 360®** accreditation
- CES signage and media kit
- Networking with trusted, sustainability-minded members to advance your business
- Education on existing and forthcoming sustainability products, systems and practices
- Access to audits and evaluations of your environmental protocols
- Annual publication of socially responsible standards and procedures
- Increased business opportunities for your company
- Annual update of member-driven, environmental and sustainability business models for the supply chain industries
- Access to *Certified Environmental Technician* training for your automotive, equipment, and plant staffs
